

Sumitomo SHI FW is a world leader in combustion and steam generation technology. The company has sold close to 500 circulating fluidized bed (CFB) steam generating units around the world, bringing high-value technology solutions to utilities, independent power generators, municipalities and industrial clients. Our leadership position in CFB combustion has resulted from our commitment to deliver superior designs providing high efficiency, fuel flexibility and low emissions.

Our power solutions expand beyond fluidized bed technologies, covering flue gas cleaning, gasification, waste heat boilers and a full spectrum of aftermarket services. We pride ourselves in being able to cleanly and reliably convert the widest range of low quality fuels, waste materials and waste heat into affordable sustainable power, heat, syngas and steam for our clients. Our goal to provide sustainable energy solutions for all types of power applications relies on the most talented people with the deepest know-how and experience in the industry.

Sumitomo SHI FW is looking for a

PERFORMANCE ENGINEER

As an assigned member of proposal or project team Performance Engineer participates in concept development with other technical experts and is responsible for the thermal- and process dimensioning of the boiler pressure parts and auxiliary equipment, participates in quantity and cost estimation and is responsible of preparing documents to performance guarantee review in Service deliveries. Service deliveries include maintenance, upgrades and modernizations. Performance Engineer in Service has an active role in supporting Customer Managers globally in conceptual and dimensioning matters both internally and in client interface. The position will be based in the Varkaus office.

Qualifications

You have a polytechnic or university degree of energy/process technology. As a Performance Engineer, you have good written and spoken skills in English as well as ability to work as part of the project team and you are prepared to travel occasionally. You are capable to manage multiple deliveries at limited time frame and you have good skills in decision making. Earlier experience of similar tasks or working with process issues is considered as an advantage.
